Brew Knights BK Tokens 2027

Website member guide | Full Edition v1.9 | Scoring catalog v1.2

Season: December 1, 2026 - November 30, 2027

Testing: this guide awards no points. Muse counts Facebook activity into the club ledger; the website displays a complete snapshot. This is a website member guide derived from Brew's supplied full edition, not a replacement rulebook.

82 ways to earn. Use #BKTOKENS and plain words; no special catalog code or website submission form is needed. Activity cards below include the deciding detail, eligibility, limit and tagging rule.

How the system works

Members post in the Facebook group with #BKTOKENS and plain words. No catalog code or website form is needed to earn. Muse matches, deduplicates and records the activity in the club ledger; the website only displays the exported snapshot.

Activities belong to their activity date, not their post date. State the activity date when posting late. Enter an activity by the end of the following month or it does not count (January activity: end of February). Member-history deadline: December 31, 2026.

Engagement is part of playing: document your contribution with the deciding facts and pictures where useful. A member who does not post has chosen not to compete for those points. Check your own weekly updates and website history, and flag errors before the deadline.

Officers own their domains and coordinate/approve the activities within them. Muse handles scanning, counting, deduplication, the record and drafts so officers can focus on the work. Each officer role includes member-sized contributions the membership can take on.

At major events, every member may post their own kegs, shifts, gear and setup work. Posts about the same work merge and count once. The event coordinator owns the official assignments and shift roster; conflicting posts do not override that record. Disputes go to Needs Review for the points administrator and coordinator to resolve.

Discrepancies go to Brew for verification. Date manipulation or hoarding claims for a last-minute dump may lead to suspension of points by officers. Muse flags concerns; it does not make integrity sanctions. Statuses: Counted, Needs info, On hold, Reversed.

A1–A8 are decided. E01 attendance and a full E02 shift stack to 8; M02 sharing and M03 challenge entry stack to 6. K01 is 5 per accepted keg with a 1-gallon minimum. P04 is one scoring purchase per calendar month. Maximum one partner bonus per member/session. First solo plus brew credit is 10, without B02/B03 on that batch. Distinct work stacks; the same work never counts twice. L01–L06 station handling is capped at 10/member/event and never added to STATION_FULL.

Updates, standings and checking your points

Weekly: Muse prepares a Thursday draft; Brew approves and posts it Friday. It includes approved awards, standings and the reminder to check your points before the end-of-following-month deadline.

Month-end: Muse prepares the post on the last day of the month for Brew to approve and post. It lists monthly earners, the full roster ranked first to last, Family Leaders, and the call to action. Website standings remain the full Muse-provided rankings.

Family Leaders are the season-to-date leaders in Counted points in each of the 10 catalog families. Recognition carries no extra points. Skip families with no Counted points. S2 belongs to Station & equipment logistics; S9 belongs to Club operations; ADV belongs to Promo, apparel & brewery support.

The monthly points-check document includes all 26 members, points earned that month, season totals, leaders for every active category, and each member's monthly activity lines with date, category, description, points, status and what is missing.

Check your points. Compare your section with your own records. Your points are your responsibility: flag anything missing or wrong before the end of the following month. The points on the books at year-end count toward raffle tickets. The rulebook governs anything not covered by an update.

Monthly tag lists use verified Facebook profiles only, never guessed matches. People who cannot be tagged appear by name and are marked name only. Website snapshots refresh whenever points change plus a Sunday refresh. A monthly Instagram celebration reusing Family Leaders is planned only when Brew approves and the club account is linked. No external post is published without Brew's approval.

Education: Hop Worts, Discord and festivals

Hop Worts may run in person or on Discord, under the Education Officer's direction. Muse reads Facebook only and has no access to Discord. After a session, the host/educator posts a #BKTOKENS recap naming the date, location, topic, host/presenter and tagged participants.

The host identifies meaningful attendance; brief pop-ins do not qualify. Normal Hop Worts attendance is D01, 3 points. Education topics and substantial-course recognition (D04) require Education Officer approval. A qualifying member-hosted education gathering follows the event ruling: attendees 5, host 10 total (hosting 5 plus attendance 5).

If nobody attends, no attendance or teaching-delivery points are earned. Original slides/handouts may still earn D09 after approval and Facebook posting. Non-member guest presenters earn no member points; eligible member attendees still count.

Festival education elements must be agreed with the Education Officer beforehand and fit his plan. An unapproved addition earns no education credit. The officer owns the education plan and is not required to justify it to others. Supplying an approved engagement element earns 3 on the gear-supply pattern; presenting an approved practical element to the public earns 5 under D07. The event recap names who supplied/presented, and the officer confirms.
